

CYP: Conquer Your Pain Formula™: Focus Word Sheet

Below are some common thoughts and words, to read through, to help you focus. The exercise is to first, slowly read each item on the positive side, focus on that item, and check off each one as you read it slowly. On the negative side, check off the words that, you feel, you commonly think about. Each day go through the positive focus words, concentrate on them and start to use them during your day. Conversely, consciously decide to STOP using negative/fearful/painful thoughts and words. Remember: you become what you think about and focus on most often. Enjoy and Be Well.
